

First in Technology, First in Training.

## FileMaker Pro Level 2

**Business Course**

**\$699**

**Two-day Hands-on Course**

**9am-5pm**

### Overview

The FileMaker Training Series is the official training curriculum from FileMaker, Inc. offering 13 training modules that cover a comprehensive set of topics designed to help you master the essentials of FileMaker solution development. This course guides you through modules 5–8 & 13.

### Prerequisites

Introduction to FileMaker Pro or equivalent knowledge is required for this course.

### Who should attend

This class is aimed at users who want to further their knowledge of FileMaker Development.

### Topics

#### Calculation Functions

Learn how functions work in the calculation engine in FileMaker Pro 11 and how to apply them in various contexts. Study how custom functions are built and how to use them in database solutions.

#### Scripts

Explore the new Script Trigger features of FileMaker Pro 11, as well as best practices for writing scripts. Learn how to build navigation and window controls, and study logical branching and looping routines.

#### Reporting

Practice creating reports in FileMaker Pro 11 using a variety of techniques. Explore sub-summary reports that group information by break fields. Learn how to build a cross-tab report (with data-driven columns) and an HTML report that is displayed via the Web viewer object.

#### Security

Study the account-based security features of FileMaker Pro 11 and learn how to implement privilege sets, tie access to database solutions to external authentication servers, control both access and authoring rights to systems, and extend security controls with scripting.

#### FileMaker Go

Get an overview of the new mobile application, FileMakerGo for iOS. Learn how to open filemaker files stored locally or hosted on a server, where FMGo differs from FMPro, and special considerations in database design for optimizing the user experience on an iPad or iPhone.
